

Easiloc

Pull Tight Security Seal

Issue: Jan 2018

The Talisman Easiloc EL range of pull tight seals are manufactured from polypropylene, and are available with strap lengths of 200, 250, 300 and 350mm.

A tear off feature is included in the seal tag and a rib is moulded on the reverse side of the strap to ensure correct entry when applying the seal.

A return loop catch is included just above the seal locking head, which allows excess strap to be tucked away, improving health and safety requirements and can also be used as a label carrier.
