

Ringloc

Fixed Length Seal

Issue: Jan 2018

The Talisman Ringloc seal is a fixed length seal manufactured from polypropylene, with a polyacetal locking jaw with a double locking action which provides a positive locking action.

The end of the strap also protrudes beyond the locking head to give an indication that the seal has been applied correctly.

A manual break point is included in the strap, so that the seal can be manually removed without the need for a cutting tool.
