

Taxi Meter Seal

Press-in Meter Seal

Issue: Jan 2018

Talisman supply two types of taxi meter seal, and offer a wide range of colour options, as each month usually has a different coloured seal for security purposes. The two types of seal we offer are the MP-14, which is a barrel shape, and the flat MP-43. These seals are compatible with a variety of meter models, including Aquila, and Cygnus products.

We can also mould customised text and logos onto the heads of the seals, to help with identification & traceability. This requires the creation of custom tooling plates, and is subject to one-off set-up charges.
