

Optoloc

Pull Tight Security Seal

Issue: Jan 2018

The Talisman Optoloc is a heavy duty, plastic pull tight seal with a smooth strap and a metal inserted locking mechanism.

Tear off is an optional design feature on the 315mm strap length only, if included, it allows manual removal of the seal without the need for a cutting tool, which reduces cost and enhances health and safety.

Gripping spikes on the strap, below the locking head, improves the grip of the seal when applied to bags.

Optional 20mm longer printing area available upon request.
