

# Taliloc

## Clinical Waste Seal

Issue: Jan 2018

The Taliloc is a security seal designed specifically for securing clinical waste sacks. Because of this, unlike printed cable ties, the Taliloc cannot be re-opened once closed, providing true security and tamper-evidence for clinical waste.

To help trace individual bags of waste and create an audit trail, each seal is printed with a unique serial number. There is also the option for two lines of custom text – such as a hospital name and telephone number, to aid in traceability.

Talisman offer a free online audit trail system on our website, where customers can assign batches of serial numbers to departments and wards, and track each seal by its serial number.

## Technical Data

### Applications

Sealing and audit trailing clinical waste bags

### Material

Polypropylene

### Average Breaking Strain

BT215 and BT265 19kg

BT200, BT250 and BT300 21kg

### Lengths Available

200, 215, 250, 265, 300mm

### Packaging

Mats of 10 in bags of 1,000 in cartons of 5,000

### Marking

Laser printing

Consecutively numbered as standard

Optional 2 lines of text as standard

Customer logo can be printed at an extra cost
